## FRONTEND DEVELOPER

### About me

I am a self-taught developer with a background in industrial engineering. My goal is to be a part of a team where I can learn, grow, and make a meaningful contribution.

### Experience

I Independently designed and developed over **40 projects**, showcasing proficiency in **React, TypeScript, JavaScript, HTML, CSS**, and various front-end libraries and frameworks. Here are a few selected projects :

#### Portfolio Website

- A personal portfolio website to showcase my work and skills. Designed a visually appealing layout with smooth animations and interactive sections. (<https://abel-portfolio.netlify.app/>)

#### Task-Management App

- A task-management **full-stack** web application that enables users to efficiently organize, track, and manage their tasks, includes **authentication, database** integration, and **responsive design**. (<https://kanbannapp.netlify.app/>)

#### Cody-Studio

- Built with **Monaco editor**, the same editor that powers VS Code. It allows you to code in JavaScript, CSS, and HTML with **live previews** and **console debugging**. Customize themes and font sizes, switch between frontend and playground views, with one-click **URL sharing**, powered by the **backend** tools such as **Node.js, Express, and MongoDB**. (<https://cody-studio.netlify.app/>)

## Education

(2023) **Scrimba Frontend Developer Career Path**  
Scrimba

(2020) **Industrial Engineering**
