Abiel Rodríguez

FRONTEND DEVELOPER

About me

My goal is to be a part of a team where I can learn and grow. I have **no issue with relocation**, I am ready to **start immediately**. If I encounter a technology or skill that I'm not familiar with for the job, I'm committed to using all of my available free time to learn it.

Experience

I Independently designed and developed over **40 projects**, showcasing proficiency in **React, TypeScript, JavaScript, HTML, CSS**, and various front-end libraries and frameworks. Here are a few selected projects :

Portfolio Website

- A personal portfolio website to showcase my work and skills. Designed a visually appealing layout with smooth animations and interactive sections. (<https://abiel-portfolio.netlify.app/>)

Task-Management App

- A task-management **full-stack** web application that enables users to efficiently organize, track, and manage their tasks, includes **authentication, database** integration, and **responsive design**. (<https://kanbannapp.netlify.app/>)

Cody-Studio

- Built with **Monaco editor**, the same editor that powers VS Code. It allows you to code in JavaScript, CSS, and HTML with **live previews** and **console debugging**. Customize themes and font sizes, switch between frontend and playground views, with one-click **URL sharing**, powered by the **backend** tools such as **Node.js, Express, and MongoDB**. (<https://cody-studio.netlify.app/>)

COURSES / CERTIFICATIONS

(2023) Scrimba Frontend Developer Career Path

From fundamentals to advanced **JavaScript, CSS, HTML, and React** concepts guided by expert instructors, enriched with solo-projects, and a supportive community.
